December 10, 2015

To whom it may concern,

We recently underwent an office renovation to increase the number of work stations in our agency. Embarking on an office renovation can be a little intimidating at the best of times but we knew we needed to do it.

I had seen some “modular type” furniture systems and really felt this was the answer to our problem. We were fortunate to make contact with Brent Hamelin from Looker Office Furniture in Red Deer. We worked through every detail of the furniture requirements and the timing of delivery and installation. Everything went exactly as planned and promised!

The end result was fantastic and we were able to expand our 6 sales and service stations into 10! With the cost of office space utilizing every square foot is very important these days.

We are very happy with the quality of the Global Contract product and the experienced installers from Looker Office Furniture did an amazing job! The job was not complete until every detail was finished.

I would highly recommend Brent and his team at Looker Office Furniture to anyone considering this type of office furniture.

Sincerely,

Warren Schnoor
President
